Lindbergh Flies the Mail: 1926-1931

Purpose
To illustrate routes and rates of mail flown by Lindbergh during his career as an airmail pilot.

Scope of the Exhibit
From 1926 until 1931 Charles Lindbergh carried mail by air. During that time The Lone Eagle was responsible for 128 inaugural flights. The exhibit illustrates examples from these routes. It includes material related to his return from the New York to Paris flight, issuance of the Lindbergh stamp and booklet pane, as well as his Latin American and Guggenheim national tours.

Organizational Plan

Section 1 1926, CAM 2  
Section 2 1927 New York to Paris  
Section 3 1928 Horseshoe  
Section 4 1929 FAM 5, 8 & 6  
Section 5 1930 FAM 5 Expansion  
Section 6 1931 American Clipper

Flown covers have a number preceding the route. Key items of interest are framed in red. Rate information is found in blue.

Personal Research

The 1925, Kelly Bill authorized the Postmaster General to contract for air mail service. In the fall of 1925 Robertson Aircraft Corporation received the award for Contract Air Mail route 2 (CAM 2) between Chicago and St. Louis with intermediate stops at Peoria and Springfield.

The 278-mile route from St. Louis to Chicago via Springfield and Peoria gave three service points, outside of Chicago, to connect with the transcontinental air mail route operated by the Post Office Department.
By 7:00 am Lindbergh had arrived in Peoria and loaded an additional 23 lbs. (about 920 covers) into his plane. Backstamp confirms final destination at Springfield, IL.

Departing Chicago at 5:30 am Lindbergh arrives in St. Louis at 10:30 am.

Mail volume can be calculated using an estimate of 40 letters per pound, or by postage sold at 10 cents per piece. Except for the northbound Springfield mail, where weights reported vary by as much as 50 lbs., estimates by weight and postage track nicely. In 1920 the population census in Chicago was 2.7 million. They sent 3,480 envelopes. In contrast, Springfield sent 19,320 and had a population of less than 60,000.
Conkling called many meetings with the Chamber of Commerce and post office staff in the spring of 1926. From the first, air mail enthusiasts faced two major problems. A suitable landing field had to be procured and then prepared for the inauguration of air mail service.

Congressman Ackerman, a noted philatelist, was regarded as an expert of US stamps and postal history. His collection included carrier, locals, essays and proofs. A part of his collection was bequeathed to the National Postal Museum.

Most letters carried on inaugural flights of CAM 2 were Northbound from Springfield to Chicago. Of the estimated 25,320 covers carried that day more than half (15,400) moved from Springfield that afternoon. Letter in Chicago by 10:00pm and arrived in Salt Lake City two days later.

September 16, 1926 (Aircraft #112)

"I turned back and attempted to drop a flare and land; but, the flare did not function and I again headed for Maywood hoping to find a break in the fog..."..."Several times I descended to the top of the fog, which was eight to nine hundred feet... My motor cut out at 8:20 P.M., and I cut in the reserve...at 5,000 ft. the motor sputtered and died.

"I stepped up on the cowling and cut over the right side of the cockpit pulling the ripcord..."..."I crossed my legs to keep from straddling a branch or wire, guarded my face with my hands and waited."

After he walked over to a car, "The occupants asked whether I had heard an airplane crash and it required some time to explain to them that I had been piloting the plane."

Despite the fact that Lindbergh retrieved and forwarded interrupted mail in both cases, virtually no collections contain examples. None of the 80 lbs. are known from the September incident. Of the 68 lbs. salvaged from the November crash (23 of which were annotated), only a single cover is known to Lindbergh collectors.

10¢ for CAM route plus 5¢ per zone. Chicago to Salt Lake is 1400 miles.
Bahr sent copies of the new stamp to both coasts. The New York envelope arrived at 10:30 on June 20th. The San Francisco cover, taking into account the three hour time difference, arrived 12 hours earlier. Washington, St. Louis, Detroit, and Little Falls, MN are considered official first-day cities.

10¢ domestic airmail from Detroit to Cleveland. Transported to New York where 3¢ paid the overseas letter rate.
C10a was first US airmail issued in booklet form. Booklet stamps had an extremely brief period of proper use to pay 10¢ airmail rate. Booklet issued May 26, 1928. Last date for 10¢ rate was July 31, 1928.

At Midwestern Philatelic Exhibition in Cleveland first airmail booklet was issued. This poorly perforated and poorly cut pane came from position 6C with a small amount of 7A visible.

Within two weeks of New York to Paris flight, Post Office announced Lindbergh postage stamp (C10). PMG Harry S. New had stamp for the pilot (and one for his mother) the day he returned from Paris aboard the USS Memphis. Stamp issued a week later.
During Guggenheim Tour (July 20 - October 23), Lindbergh visited 92 cities in all 48 states. He gave 147 speeches and travelled 1,290 miles in parades. 30 million Americans, a quarter of the population, personally came out to greet him. In his spare time he designed a wrist watch, wrote a New York Times bestseller (We) which sold 650,000 copies, and was named Time magazine’s first Man of the Year.
Conkling, the Springfield postmaster who had worked diligently to promote use of Air Mail in general and CAM 2 in particular, enjoyed collecting envelopes carried by Lindbergh. After declining $1,000 to carry a pound of covers for a stamp dealer, Lindbergh decided to carry only two—one for his Robertson Aircraft friend, Brandeweide, and the other for Conkling when he set out to fly the Atlantic. The envelope was carried by Lindbergh’s boyhood friend, Bud Gurney, with whom he had taken his first airplane ride in 1922.

Overpaid (by 2 cents) number 10 envelope on Bahr stationary. Cover left Springfield at 1 pm arrived St Louis at 5 pm before traveling back north to Peoria. Postage may have paid Airmail plus surface rate. Autographed by Lindbergh’s hero, WW 1 “Ace of Aces” Eddie Rickenbacker, who would later lead Eastern Airlines. Rickenbacker won the Medal of Honor in combat while Lindbergh was the first to receive the award in peacetime.
U.S. ambassador to Mexico Dwight Morrow, suggested Lindbergh’s tour of Latin America. They met on the young aviator’s trip to Washington after his transatlantic flight. Morrow believed Lindbergh might help seal a diplomatic rift between Mexico and the United States. Lindbergh would end up marrying the Ambassador’s daughter, Anne.

The State Department approved the flight and suggested tour be extended throughout Latin America. Involvement in Nicaragua had created bad feelings toward the United States, and the State Department hoped Lindbergh’s tour would improve the nation’s standing in Central America. Lindy was well received everywhere he landed.
During Latin America Goodwill Tour, Lindbergh, who was working with Pan American Airways and knew Rowe, agreed to carry three sacks of mail in the *Spirit of St Louis*. Pan Am wanted to acquire West Indian Aerial Express. 1,607 pieces were carried.

In the plane with me were three sacks of airmail. The first airmail ever carried in the ‘Spirit of St Louis’. One bag was from Santo Domingo. Although I left it in the plane for two days, while in Port au Prince, it still got to Havana sooner than it would have by boat.

Basil Rowe learned to fly in the Great War. He barnstormed the West Indies and United States until July 1927. He became chief pilot for West Indian Aerial Express which was absorbed by Pan Am in September 1928. 1,570 envelopes from Santo Domingo were carried in the *Spirit*. Volume from Port of Prince unknown as many lost in 1931 hurricane.
Volume of philatelic mail posted that weekend was massive. Motor trucks employed in Chicago moved planeloads of envelopes. Of the 310,522 covers known carried by Lindbergh more than half (170,880) were flown that weekend.

Double rate Springfield (20th 4pm) to Chicago (21st 4am) and return by 9am on Feb 21st.

Flight the previous evening from Peoria to Chicago. Backstamped Detroit at 2pm Feb 21st and then sent Express to Montreal the following day. Unusual mixed franking.
Far less common than standard city machine cancel are postmarks from Chicago Air Mail Field. Shown here is an attractive C10 on an air mail envelope.

In an effort to differentiate from the other 170,880 “horseshoe” covers carried by Lucky Lindy, a collector obtained a very scarce Midway cancel.

Lindbergh carried it for 310 miles by air for 10 cents. Three cents took it the remaining 8,242 miles.

By the time Lindbergh came back to visit in 1928 the original pilots (Lindbergh, Nelson & Love) had been replaced by Leslie Smith, EL Solonger, and Slim’s friend Bud Hurley. Tribute label was produced by the American Booklovers Society.
Letter sent from Conkling addressed to Bud Gurney at Robertson Aircraft Corporation. Pilots for this flight included Lindbergh, Love, and Gurney. 112 lbs. of mail carried.

This cover belonged to G. J. Brandeweide, employed as Superintendent of Robertson Aircraft Corporation when Lindbergh was Chief Pilot. Lindy carried two letters on his transatlantic flight. One for Postmaster Conkling and the other his friend, Brandeweide.

Gurney, Lindbergh and Sloniger moved 778 lbs. Springfield to Chicago on February 20th.
North of Chicago folks wanted covers carried by the Lone Eagle. This envelope arrived from Milwaukee at 4:00am and made the trip arriving in Springfield at 9:00am.

South of CAM 2 this cover entered mail stream at Indianapolis. Curiously, postmark says 2:30pm with a receiver mark in Chicago at 4:00am. It then traveled to RAC in St. Louis. Envelope went from Indiana to Illinois to go to a big city Missouri without a street address (RAC was actually based in Anglum).

SCADTA, based at Barranquilla, sought a mail contract to carry from Key West to Panama. To block effort of the German financed airline flying near Panama Canal, US Post Office instead promoted a fledgling concern created by three Army pilots, Jack Jouett, Hap Arnold, and Carl Spaatz who named their company Pan American Airways.

Columbia granted Sociedad Columbo-Alemana de Transportes Aereos (SCADTA) monopoly to carry mail in Columbia, maintain post offices and print stamps. When sold in foreign consulates stamps bear an overprint of the nation (A for Austria, B for Belgium, C for Cuba, etc.). Note the US (EU) consular overprint. SPOONER reports as rare.
Lindbergh carried mail with a complete C-10a booklet. Overpaid by 3¢.

According to Lindberghiana expert George Sioras, mail received in Panama from Miami proceeded to “intermediate stops” in Latin America. He identified Belize City as stop number 3 and Tegucigalpa as stop number 4. Since mail is known to Punta Arenas, this has been labelled stop number 2. FAM 5 mail destined for addresses other than Cristobal would be sent to Cartagena and then frequently to Barranquilla (home of SCADTA). It is unclear under this scheme which the Columbian city would be intermediate stop number 1.

On return only Canal Zone mail officially sponsored by US Post Office. As a courtesy, Pan Am carried Panama mail in second aircraft. Not carried by Lindbergh, the “Outlaw Flight” became associated with collectors. The courtesy was severely criticized in aerophilatelic circles.

Under Sioras scheme, intermediate stops are not based on geographic proximity. Mail originating in Columbia transported past Honduras to arrive Belize.
This envelope entered the mail stream in San Antonio. It is backstamped Brownsville where the first flight to Mexico City originated. Receiving marks at Tampico (Mar 9), Mexico City (Mar 10) and finally Monterrey (Mar 13) are found on the reverse.

Overpaid (by 2 cents) held for three days at Brownsville for the FAM 8 flight. Some mail bags overlooked in the wings of Lindbergh’s plane for a month. Backstamped in Mexico City with the original March 10th arrival date “in order not to destroy their philatelic value”. Letter discovered April 9th, this piece not likely “Lost Mail”. Supplementary postal or commercial backstamp dated between April 12th and 17th is required.
Express mail posted Mexico City. Backstamped Brooklyn, New York.

Lindbergh flew first eastbound leg of the transcontinental route on July 8th. Unfortunately, TAT did not have a federal contract to carry the mail. Additionally, virtually all cards and covers with Los Angeles cancel are postmarked at 3pm. Lindbergh left at 8:50AM so all covers marked July 8th did not make flight.

3pm cover with a Winslow, AZ receiving mark. In addition to being too late to post, the backstamp is dated four days later. Hardly supporting evidence of speedy transit by TAT.

Transcontinental Air Transport (TAT) was an ambitious plan to provide cross country mail service in two days. Passengers and mail by air during daylight hours and by rail during the night. On July 7th in 1929, TAT inaugurated coast-to-coast air and rail service on the route laid out by Lindbergh from New York to Los Angeles.
Accompanied by his new bride and Juan Trippe (and wife) from Pan American, Lindbergh blazed the FAM 6 Extension piloting a Ford tri-motor Fokker. At San Juan they switched to a pair of S-38 Sikorsky flying boats as seen on cachet. Franking includes C10a booklet stamp.

Canadian cover overpaid by 2 cents (same as US rate) sent to General Delivery, a holding destination for collector mail or sent to someone who has not established a local address.
53b. Miami—St. Johns

Much of FAM 6 inaugural mail collected and held in Puerto Rico for Lindbergh’s arrival. While most mail has a single postmark on the face, many FAM 6 sport both Miami and San Juan cancel. Unusual C6 airmail and commemorative used to make up the mid-Extension rate.

53c. Miami—Castries

As the sun rose on September 22, Lindbergh lifted the flying boat from the harbor in San Juan for the short hop to St. Lucia.

53d. Miami—Port of Spain

Round trip sent from US to Trinidad with Lindbergh (overfranked by one cent). Returned on Northbound flight (65) by another pilot.

53e. Miami—Georgetown

 Appropriately franked, although with poorly centered stamps, letter from Miami to Georgetown. At these distances the rate (40 cents) is the same as Paramaribo.
As the longest leg of the route, letters posted from Haiti to Dutch Guiana required 3 gourde. All received the Lindbergh First Flight blue handstamp.

Beginning with landing of US Marines at Port au Prince in 1915, the United States occupied Haiti. Combination of potential German military threat and encouragement of powerful American business interests resulted in control lasting until 1934.

When Lindbergh visited in 1929 Occupation had been a mixed blessing. Some corruption and instability had been quelled. Infrastructure much improved but poverty continued unabated. Weeks after the inaugural flight, student protests and general strikes convinced Hoover Administration to create an exit strategy. Following the election of FDR the Marines left.

Close to St Lucia and halfway through route, charge was 2.25 gourde.
The S-38 could takeoff from either land or water, climb at 1,000 feet per minute fully loaded, cruise at 110 miles per hour with a maximum speed of 130 miles per hour, and could fly on one engine. No other contemporary amphibian had comparable performance characteristics.

During this period Haiti used “internal” and “external” stamps. Normally, postage was paid in gourde and centimes. Rate from Port au Prince to Georgetown was 3 gourde. Here an external stamp of 1 piaster was used.

It was Sikorsky’s first commercial success. The S-38s operated around the globe pioneering executive travel and establishing many first air mail and passenger air routes. It was estimated that S-38s flew over 25,000,000 miles, about one thousand times around the world.

Most philatelic mail carried on the inaugural flight was sent by an employee of the Public Health Service of Haiti headquartered in Port of Prince.
Christopher Columbus arrived in 1492 on the island he named Hispaniola. His younger brother Bartholomew remained and in 1495 renamed Spanish settlement "Santo Domingo", in honor of Saint Dominic. It became the oldest European city in the Americas. Subsequent expeditions led to Ponce de León's colonization of Puerto Rico, Diego Velázquez de Cuéllar's colonization of Cuba, Hernando Cortes' conquest of Mexico, and Vasco Núñez de Balboa's sighting of the Pacific Ocean were all launched from Santo Domingo.

Samuelson claims 2 centavos plus a 10 centavos air mail fee was all required to any of the destinations. Interestingly, of the five pieces shown, this one, at least according to Samuelson, is the only one that isn’t overfranked.
Rarest of the Santo Domingo dispatches. Samuelson’s belief that all points required just 12 centavos does not seem accurate. Nearest destination (St. Thomas) was franked at 12 centavos. Castries had 25 centavos on the envelope. Misdirected Port of Spain had the wrong postage. Being farther than Castries one would imagine either the same (25 centavos) or more. It had 20 centavos and did not show postage due. Farthest destinations (Georgetown and Paramaribo) are both franked 40 centavos as one might expect.

Various amounts of postage found on envelopes. With the exception of St. Thomas where all examples were 12 centavos, each destination had significantly different amounts with no postage due or evidence of philatelic overpayment.
“T” is the international indication for Taxe, or postage due. In this case, full trip from San Juan to Paramaribo was 40 cents. Underpaid by 10 cents (or 50 centimes). Unclaimed mail sent to General Delivery returned to sender after 5 days the postage due was never paid.

Jaime Gonzales, a collector living in San Juan, used these colorful airmail envelopes with a scene of the harbor of San Juan to document Lindbergh’s travels.

First flight to the Leeward Islands is underfranked by 10 cents.

This piece to the Windward Islands is overpaid by one cent.
Grover Loening was an aviation giant. He attended Columbia University receiving the first degree in Aeronautical Engineering. He ran the Wright Company in Dayton for Orville Wright. He designed and tested his own aircraft and his employees would form Grumman Aircraft.

George T. Street of Havana, Cuba offered a subscription service to early airmail collectors. His ads appeared in the first edition of the Air Post Journal in 1929.

E C Titus enjoyed sending miniature envelopes at a time before the Post Office exacted a surcharge for non-standard sized covers. Here he overpaid by 5 cents. Barbados lays halfway between St Lucia and Trinidad where the correct rate for both is 25 cents. It left San Juan on the 22nd and arriving Castries the same day. A backstamp records arrival in Barbados on the 27th.

C-10a pane and two copies of the Ericsson Memorial issue pay correct rate from Puerto Rico to British Guiana. Envelope opened and resealed with cellophane tape and Post Office Seal from the lower right corner of a 20 issue pane. As with all mail sent for collectors, the envelope was uncalled for and returned to sender.
Travel the full route from Virgin Islands to Dutch Guiana in South America required 40 cents. Here collector’s cover held by the Postmaster for five days and returned as not claimed.

For intermediate distance a fee of 25 cents was required.

By 1929 St Thomas, St Croix, and St John (the US Virgin Islands) had been part of the United States for 12 years. They were bought for $25 million dollars in gold.

Interestingly, the return instructions are typed but not the address in British Guiana. It appears in pencil and may have been added by a subsequent collector seeking to understand the routing of the envelope. Like unaddressed covers seen on inaugural flights earlier in the exhibit that were routed correctly there must have been postal authorities supportive of collectors.
59a. St. Kitts—St. John’s—St. Johns Ex-SPOONER 28 pieces (all destinations)

Envelope from local resident to the cable office in St. John’s. Since collectors were not notified of this unscheduled stop very few pieces are extant to document the trip. Spooner, who displayed this extraordinary example in his award winning exhibit, 59c. St. Kitts—Port of Spain 28 pieces (all destinations)

Both Spooner and Samuelson exhibited Gonzalez covers sent to San Juan. Gonzalez normally addressed his mail in care of the Postmaster at the location the route was scheduled. Here the address is his post office box in Puerto Rico. Did he suspect unscheduled stops? Who applied the postage? Is the rate correct or overpaid? At least 3 of 28 St. Kitts covers are Gonzalez addressed to San Juan. Are there more?

59b. St. Kitts—St. Johns —Miami 28 pieces (all destinations)

In August 1930 Havana dealer George Street offered a St Kitts to San Juan for $50. It’s present value would be $730. He priced it the same as the Georgetown to Port au Price flight of which 4 were reported. In the same issue, Royce Wright advertised at St Kitts to St Johns to Miami for $50.

Was any St. Kitts mail non-philatelic? The handwriting differs from the “Bell” example so was prepared by someone else. Was mail awaiting transport by boat when the Leeward Islands Governor asked Lindbergh to fly it? Sender posted letter to a St. Kitts resident (himself?) suggesting intent in a Lindbergh flown souvenir. Is 9d appropriate to carry the letter to Trinidad?
Commercial cover addressed to business in Georgetown. Banks were early adopters of airmail as it enabled them to clear bank drafts faster. Perhaps for privacy reasons the name of the addressee has been excised prior to receipt by the collector.

Spooner reported 9d, both north and south, was correct rate to Antigua and St. Lucia.

Postage of 10d paid from Antigua to Trinidad before returning north to Martinique.
St Lucia did not have a First Flight cachet but did produce a round canceler.

9d paid to post this envelope from Trinidad to Dutch Guiana.

Same day service Port of Spain to Georgetown. The flight departed at 7:30am from Trinidad and sports a receiving mark of 2:00pm in British Guiana.

One of 376 covers posted from British to Dutch Guiana.
The most common segment flown from Georgetown was the complete trip to Miami and beyond.

Registered rate for this first flight to Trinidad. 345 pieces carried.

Northbound envelope with colorful 5 value franking with same day service to Puerto Rico. While the number of letters mailed to San Juan was relatively large (544) many destinations were very poorly documented. Of the eight destinations five had less than 100 covers with Santo Domingo receiving eight and Havana only four.
52 1/2 cents paid for first leg of Suriname mail to Georgetown. 90 cents paid for same trip segment for a registered envelope.

Registered business envelope with 1 gulden, 80 cents postage. Lindbergh carried as far as Trinidad before departing on a private trip across South America, up Central America, and back to the US. Jack Tilton finished delivering the mail to Miami.

5 1/2 cents used to post a registered letter to The Netherlands.
In order to be competitive with regional carriers Pan Am needed to reduce the time required to travel from Miami to Panama. Extended range amphibious aircraft entered the market.

FAM letter rate 20¢ plus 15¢ Registration fee.

435 pieces of mail were carried from Paramaribo to San Juan.

One of 119 covers transmitted to Port of Prince, Haiti.
In 1927, Basil Rowe founded West Indian Aerial Express, offering service between San Juan, Puerto Rico, Santo Domingo, Haiti, Cuba, and the Virgin Islands. When WIAE was absorbed by Pan American Airways in 1929, Rowe joined Pan Am as their first Captain. Rowe logged over 35,000 flight hours throughout his career.

28 centavos pays the rate for the first airmail flight from Puerto Cabezas to the States. Although the AAMS 5th Ed. fails to suggest the number carried it was clearly low. First flights from Nicaragua were also made to Cristobal in Panama as well as Havana, Cuba.
1930

74. Cristobal—Miami

Competition lowered prices. After January 1st the cost to carry this express mail in either direction became 20 cents.

74b. Cristobal—Havana Ex-SPOONER

75. Panama City—Miami

It was estimated that about 120 envelopes were sent to Cuba. No mail was dispatched north from Havana.

Airmail rate 20 centesimos
Registration fee 10 centesimos
(overpaid by 2 cents)

US law required that rates from the Canal Zone to the US be set equal to the same rates from the US to the Canal Zone.

76. Colon—Miami

Of 17 Lindbergh flights from April 26th to May 2nd 1930 as part of the FAM 5 Express Air Mail Service, none carried more than 400 letters. The majority carried less than a pound (40 envelopes). About 120 covers flew from Colon to Miami.

76a. Colon—Puerto Cabezas 16 pieces carried (est.)

Just a few pieces document the first flight from Colon, Panama to Puerto Cabezas, Nicaragua.
In order to get Argentinian mail to use its flights Pan American needed to match competitor NYRBA. Pan Am’s rival offered Commodore mail service, Buenos Aires to the US in seven days. While this was possible in good weather, it was often a difficult promise to keep.

PANAGRA was a 50/50 partnership between Pan American and W. R. Grace Shipping created in 1929 to compete with SCADTA. Grace dated back to 1854 when the Peruvian firm transported guano and sugar. As PANAGRA Airways its network stretched from Panama and the U.S.-controlled Panama Canal Zone to Santiago, Chile and Buenos Aires.

While Lindbergh flew this as part of the FAM 5 Express segment as far as the Canal Zone, others carried it into South America. PANAGRA continued FAM 5 and 6 along the east coast of the continent. This cover hugged the FAM 9 route on the west coast to arrive in Lima.
American Clipper, a massive Sikorsky S-40 capable of carrying 44 passengers, cargo, and mail, became flagship of the Pan Am fleet. Specially designed for the airline, it flew the Caribbean with speed and comfort. Example (with black instead of blue cachet) posted with correct Miami to Cuba rate.

Postmarks from Miami read Nov 19th at 7am or Nov 20th at 7 or 7:30am. It has been reported Lindbergh delayed departure until the 20th. Previous receiving marks in Cuba have supported a Nov 20th arrival.

This sentinel cover shows an arrival in Havana on Nov 19th at 11am. Curiously, the envelope is addressed to the city of Sancti Spiritus in central Cuba. It is 220 miles from Havana and closer to the city of Cienfuegos.

Correctly franked with 10 cents to carry on first flight to Kingston. During evening dinners Lindbergh reportedly dined with Rowe and Sikorsky planning the next generation of transatlantic aircraft. Cachet on reverse shows original November 17th planned departure.

June 1931 the 1/2 oz. rate, FAM from Miami and air in Columbia, established at 35¢.
By 1931 SCADTA had been acquired by Pan American Airways but was operating as more or less independent subsidiary based in Barranquilla. Lindbergh stayed for inspection of facilities and technical discussions with SCADTA personnel.

Map stamps used to pay the 35 cent rate to Columbia.

Envelope at right received at headquarters of SCADTA in Columbia on Nov 22nd. The next day carried as courtesy from Barranquilla to Bogota.

Business sized envelope with Pan American Airways corner card used to document "American Clipper" service from Miami to Cristobal.
1931

84. Cienfuegos—Kingston

Total of 228 pieces were carried. Unscheduled overnight delay due to a broken starter motor.

85. Cienfuegos—Barranquilla 112 pieces

Departing November 21st correctly franked (35c) cover arrived Barranquilla the following day.

85. Cienfuegos—Barranquilla

Even more scarce than the Cuba to Columbia letter to the left is this Registered piece (added 10 cent fee) with SCADTA receiving mark dated the following day.

86. Cienfuegos—Cristobal

209 covers posted from Cienfuegos to Cristobal. Since flight from Miami did not arrive until 1:30 on the 20th, it was too late to arrive in Kingston before dark. The flight finally departed on the 21st and arrived in the Canal Zone the following day.

84. Cienfuegos—Kingston

Departing November 21st correctly franked (35c) cover arrived Barranquilla the following day.
In 1929 the Canal Zone had a 1/2 oz. rate of 10¢ to the Columbian coast. To the interior coast 25¢.

Peer, an avid Lindbergh collector, had this cover mailed from Panama to Columbia.
Cheap 1/2 oz. air mail rates in the Caribbean were to Trinidad, Martinique and Jamaica.

Originally, Canal Zone to the US was 25¢ for the Air fee and 2¢ for the Surface rate. Within a year the 25¢ was inclusive. By January 1st, 1930 the inclusive rate had decreased to 20¢.

The air mail rate to Cuba (and Puerto Rico) prior to 1937 was 20¢.

For this flight only SCADTA and Columbian stamps were required. A 30c SCADTA airmail stamp and two Columbian issues make up the 35 centavos rate. Some mail (including this piece) travelled from Jamaica to Miami and beyond while a few went to Cienfuegos, Cuba.
Northbound letters from Cienfuegos had a cachet but did not list a date. It was added later with a handstamp.

This isn’t the end of Lindbergh’s story. While he carried regularly scheduled mail from 1926-1931 he would influence America’s commercial aviation and American rocketry, preparedness for WWII, winning the war, and later the environmental movement. Lindbergh got the financing for Robert Goddard, the father of American rocketry.

Worked with Dr. Alexis Carrel, the first physician to win a Nobel Prize, on a perfusion pump, also known as an artificial heart.

Lindbergh in the late 1930’s personally inspected military aviation in Germany, France, England, and the USSR. His recommendations coupled with a 23 stop tour of American capability got President Roosevelt to recommend $300 million for expansion of Army and Navy airpower.

After leading the opposition to America’s entry into WWII he served as a test subject at the Mayo Clinic, conducted flight test on fighters to extend their range from 6 to 10 hours, and flew 50 bombing missions as a “technical representative” in the South Pacific. Lindbergh helped reinvent Strategic Air Command after the war.

Lindbergh, a beanpole airmail pilot from Minnesota, had become, and deservedly so, “the most celebrated living person to ever walk the earth.”

Berkshire Exchange advertised in the first issue of the Air Post Journal (Nov 1929) they could supply airpost stamps and covers, including early classics, wholesale to dealers. The owner, Donald Dickason, lived in Wooster, Ohio. His Dickason Auction Sale would routinely have more than 3000 lots. He also published the Standard Airpost Catalogue.

W. D. Peer was without peer. He had a knack for having mail carried on some of Lindbergh’s scarcer routes. No official cachet was available from Jamaica.
